## Organization Overview

Wet Paint Group was founded in 2012 with the vision to elevate the overall guest experience at corporate events and meetings. The Founders, Dana and Doug Chorpensing, offer over 40 years of combined experience in the hospitality events industry with their employees adding an additional 60 years of event management experience. As a result of producing hundreds of events, they recognized that there was an opportunity to bring new brands to organizations that thought they were limited to "everyday" merchandise. Consequently, Dana's idea emerged to offer unique gifting solutions with an emphasis on gifts that have an associated charitable contribution. This has since become the company's slogan: ***Gifting with a Give Back.***

Most of Wet Paint Group's clients are Fortune 500 companies seeking innovative gifting ideas that excite their high-value guests. With a consultative approach to our clients, Wet Paint Group supports this niche not only by sourcing all gifts with intention, integrity, and sustainability, but also through Gifting with a Give Back. A portion of proceeds from each gift through Wet Paint Group goes back to a non-profit organization. Wet Paint Group's non-profit partners include The Special Operators Transition Foundation (SOTF), The Sudara Freedom Fund, One Tree Planted, The Cleveland Clinic's Cole Eye Institute, and many more.

## GIFTING WITH GIVEBACK

We know how challenging it can be to find the “right” gift for your high-touch events. wet paint group was created out of necessity by a team of meeting/incentive industry veterans to provide fresh amenity ideas to our peers.

In addition to offering unique brands that punctuate your event with “Wow!” moments, we are passionate about giving back to the community through various CSR initiatives. We call it “Gifting with Giveback!” By connecting the right gift with a greater purpose, your guests will not only appreciate the thought behind the experience, but more importantly, will have an emotional connection to the entire event messaging. The gift becomes a vehicle to share the story and inspire attendees to make significant contributions to both the host organization and the world around them.

## CSR | CORPORATE SOCIAL RESPONSIBILITY

Our **Gifting with Giveback** philosophy enhances the meaning behind your gift experience by combining unique amenity selections with a greater purpose and social responsibility. By partnering with wet paint group, you not only offer your guests a remarkable experience, you also contribute to a variety of global charitable initiatives. We intentionally align with brands that value community service and support-worthy causes. With wet paint, you are not buying a product, or even a gift, but instead, an experience that keeps giving long after the event is over.

Through intentional messaging, we strive to connect on a deeper level and help inspire attendees to take action. Your gift will remind attendees of your thoughtfulness, your message, and the overall trip experience. Our professional staff work with you to align your amenity and event objectives with the appropriate CSR initiative creating a memorable experience. A portion of the proceeds from each gift experience will be contributed to the brand's respective philanthropic partner or wet paint group's designated charitable partner if no giveback organization is tied to the brand directly.

wet paint group is proud to partner with Guardian Group to be "Guardain Seal" certified. Guardian Group's mission is to prevent and disrupt the sex trafficking of women and children while enabling partners to identify victims and predators in the United States. Guardian Group offers a "Guardian Seal" Training that wpg is proud to hold and recommend to all. Please ask us how your team can take this training and help protect yourself, your loved ones, and your community.

## PROVEN PROCESS

intrigue.

immerse.

inspire.

Our process is based on a simple formula that maximizes the overall impact of each experience - **INTRIGUE. IMMERSE. INSPIRE.**

● **intrigue** Our amenity brands are carefully curated by our leadership team. We only offer products found in small boutiques or with limited distribution. Our brands will not be commonly found at everyday retailers or big box stores. Your executive level guests have the buying power to purchase whatever they desire, so we offer brands that evoke intrigue. Brands with cache and exclusivity. This sets the stage for what we like to call “Now, that’s cool!” moments.

● **immerse:** While each of our gifts are unique and intriguing, we lean into the production of our gift experiences in ways that touch all of the senses and tug at emotions. Whether a boutique style marketplace or a beach party scene, the experience atmosphere immerses your guests in the story behind the brand and give-back initiative. Our on-site brand ambassadors effortlessly engage with each guest and share the narrative of the event, each gift, and why it is special. When attendees understand the “why”, they are more likely to recognize they are part of something truly remarkable.

● **inspire:** Through a deep emotional experience, we are able to activate the event message and inspire each guest. The gift or amenity serves as the conduit to transport your attendees back to the experience, reminding them of the event, message and location long after the event’s conclusion. It serves as recognition of the past and fuel for the future. This is the true value of the gift, inspiring your guests to invest and contribute to both the company and social agenda in a meaningful way, a **GIFT WITH A GREATER PURPOSE.**

### Born from a seed

Prized for its resilience to drought and low use of resources, the seeds of a castor plant are harvested as our hero ingredient.

### Formed into pellets

Through the process of polymerization (the combining of small molecules to create a large chainlike molecule), the oil is turned into plastic pellets called polymer.

### Pressed into oil

The castor seeds are then pressed to produce a dense oil rich in fatty acids. Castor oil has been widely used for thousands of years due to its rich and unique ricinoleic acid content.

### Cast into molds

The polymer is then injected into our signature camp molds, resulting in strong, lightweight, and ultra-comfortable frames.

Whether it be food insecurity, sustainability, vision services, cancer awareness,
